## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Winn et al (U.S. Patent # 5,168,540). Regarding independent claim 6 and dependent claims 5 and 7, Winn discloses in Figure 1 and column 6, line 55 through column 7, line 2, a scintillator panel comprising: a substrate 102; a scintillator 104 formed on said substrate; and film (or cladding) 106, formed of any suitable material by chemical vapor deposition (col. 6, lines 64-67), covering all sides of said substrate 102 and said scintillator 104.

### Allowable Subject Matter

- 3. Claims 1-4 are allowed.
- 4. The following is a statement of reasons for the indication of allowable subject matter: regarding independent claim 1, the prior art does not disclose supporting said substrate formed

with a scintillator on at least three protrusions of a target-support element disposed on a vapor

deposition table. The remainder of the claims are allowable due to their dependence.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. Persyk et al (U.S. Patent # 5,148,029) discloses an imaging device comprising: a

scintillation panel covered on all sides by an organic film.
